MORTISING CHAIN UNIT CATENO F

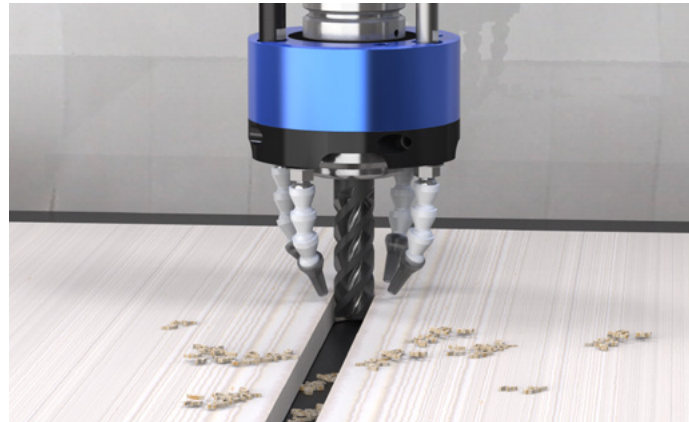

Mortising of deep and flat slots

- + automatic chain tensioning during processing
- + no additional chain lubrication required
- + for all common Mafell chain sets

BLOW NOZZLE UNIT SOFFIARO

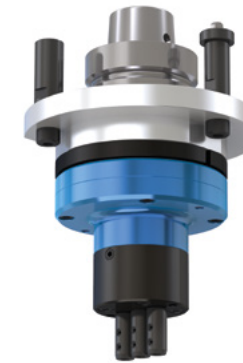

Efficient cleaning of the processing area with up to four blowing nozzles

- + saving money: energy-efficient blow-off due to control of the compressed air volume
- + compact design for vibration-free running
- + on request with hydraulic expansion chuck for highest concentricity

MULTI-SPINDLE HEAD MULTI V3 CABINEO

Vertical drilling of pockets for CABINEO connectors in one single stroke

- + reduction of processing time
- + complete machining in the nesting process incl. connector pocket
- + highest accuracy and thus optimized assembly of the connector

BENZ i.tag — DIGITAL NAMEPLATE

With **BENZ i.tag**, the digital nameplate, it is possible to call up product data on a smartphone at any time and from any place

- + time saving: technical data and documents always at hand and available
- + quick and easy handling via smartphone, no special software required
- + direct contact to the service team
- + worldwide availability, link can be sent
- + savings in storage and logistics costs (no more paper documents)
- + sustainability in operation and additional protection of the environment
