FLOATING EXACT MACHINING

- Drilling, milling and sawing operations adapted to the surface
- Exact, even results by the compensation of any plate tolerances or clamping inaccuracies

FLOATING H S
Horizontal floating
trimming unit

FLOATING V C
Vertical floating
trimming unit

CONNECTING GROOVE / TRIPLE HOLES

- Short machining times
- The machining process can be implemented directly in the CAD planning
- Groove depth is traced exactly from the workpiece surface ¹
- Triple holes in one machining step ²

P-System
READY

¹ FLOATING H Tenso
Horizontal floating trimming
unit for vertical grooves for
Tenso P-14 connecting fitting

² MULTI V3 Cabineo
Vertical multi-spindle head
for machining pockets for
Cabineo connecting fitting

SANDING PERFECT SURFACE

- Complete machining on the CNC machine
- High sanding performance
- High surface quality

COLLEVO +
Belt sanding unit for
flat surfaces, exterior
and inside roundings

SIMOLO
Orbital sanding unit
for flat surfaces, convex
and concave surfaces
